

TAAP Local Authority specifically addresses the mobile worker aspect of local authority responsibilities: Repairs & Maintenance/Serviceing for housing, open spaces, & public highways; Social Care; Lone Workers; Security; Parking; Fleet Management; and many other applications.

Examples - a void report for housing, and a vehicle tyre inspection

Repairs and maintenance/serviceing relating to housing, open spaces, public highways etc. is easily dealt with using TAAP's mobile workforce software solutions.

Fleet management for all types of vehicle is made simple using TAAP's Vehicle Maintenance, Deliveries, Inspections & Assessments, and Disposals mobile technology. Photographic capture and damage annotation features included.

Benefits

Cost savings - gained through increased personnel productivity as there is no need to re-key information, fuel and travel costs are reduced, and there is better management of damage or repairs to vehicles/property/highways.

Time savings - far less time is spent by mobile workers travelling to and from the office. Time spent chasing missing data or re-keying information is eliminated.

Environmental benefits - vastly reduced paper processing, less fuel & travel costs, and repairs/maintenance conducted more efficiently.

Improved customer service - processes are conducted more efficiently, providing the community with a more responsive local authority service.

Features

Integration with existing back-office systems - TAAP's mobile application software is available as a stand-alone system or can be easily integrated with any back-office systems you may use.

Job allocation and time logging - jobs can be added, allocated to personnel, logged on and off (thus creating automatic timesheets), which gives managers a real-time overview of activity.

Security for Lone Workers - mobile devices can be used to communicate with managers/central control by responding to alerts, logging on to jobs, and using built-in GPS to locate their position.

Electronic form filling and secure data capture - any form/process can be replicated using TAAP's mobile application software, and data capture is securely managed for total peace of mind.
