

Mobile Workforce Solutions

TAAP Advantage

Provide a service or deliver a product and get documented customer sign-off

TAAP's Advantage application enables items or services to be delivered seamlessly, with customer and supplier documentation included. Easy to use, eliminates paperwork, and allows you to view data in real-time. Completed documentation such as a delivery note, certificate, contract etc. is displayed in the web portal and can also be sent as a pdf by email.

Are You 'On Route?'

Vehicle on Route (TAAP VORTEX™) is part of TAAP's Advantage application which improves customer service in situations where an item is being transported or a service representative is visiting a customer. It allows the driver of the vehicle to send a text message to the customer that they are 'on route,' when the journey begins - by pressing one button within the software application. The driver's mobile device then sends a second message to the customer when they are close by (i.e. 10 miles, 5 miles etc. - this distance is configurable for the client).

Benefits

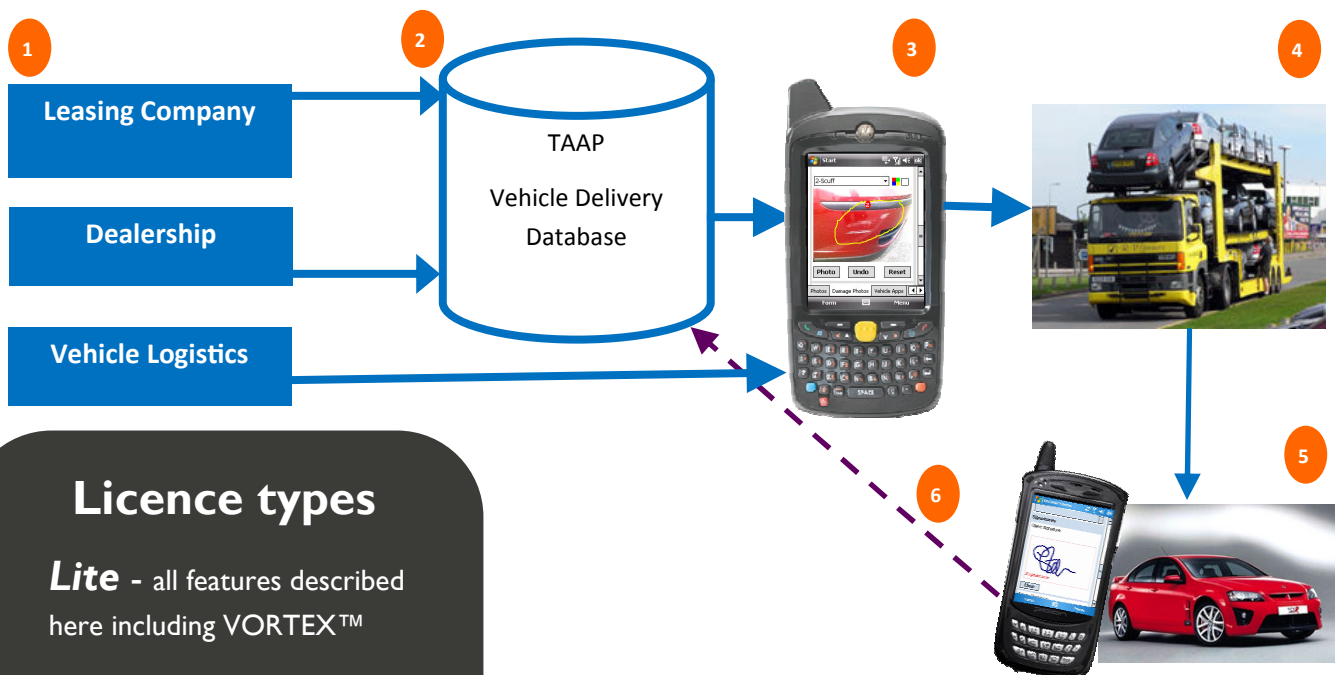

- Documentation sign-off and time & date stamp ensures the service or product is definitely delivered so no need to chase 'paperwork'
- Photo capture means fuel or expenses receipts are recorded
- Eliminates paper
- Increases productivity
- Improves customer service

TAAP Advantage has been configured for the Automotive industry with **Dealerships, Leasing Companies, and Vehicle Logistics Agencies** in mind.

Deliver a positive brand experience with **TAAP Advantage**. Complete your vehicle handover using a mobile device (PDA) to improve quality of service, accuracy, and efficiency.

- **Leasing** - complete your acceptance certificate and supply in an electronic branded format within seconds.
- **Dealers** - vehicle handover and acceptance documents signed for, time & date stamped, and viewable in real-time.
- **Vehicle logistics agencies** - working as a contractor for a dealer or dealer group, complete the delivery of the vehicle and provide real-time feedback and proof of delivery.

Advantage allows you to review all activity within a secure hosted web portal.

Licence types

Lite - all features described here including VORTEX™

Professional - same as *Lite* but also includes integrated sat-nav software

Enterprise - integrates with your existing systems and processes (requires bespoke development)

How to buy

Call TAAP on 0845 230 9787

We'll help you to choose an appropriate device, select a compatible airtime package, and get up and running quickly.
